skinXpert™

4-in-1 Facial Beauty Wand

User Manual

DERMOVIA™

Enjoy flawless skin by committing to
only 5 minutes a day at home

THE FIRST PERSONAL BEAUTY DEVICE TO ADOPT COMBINED SKINCARE SCIENCE TECHNOLOGIES.

skinXpert uses advanced technology that combines the use of ions, micro-current, galvanic wave, ultrasound, EMS vibration, and polarity ions resulting in firmer, tighter, and more youthful skin. There's no need to ever again undergo expensive treatments from a doctor or beauty salon. From the comfort of your own home, you only need about 15 minutes a day to prevent and reduce wrinkles and improve skin tone and elasticity.

Understand your skin and take care of it.

HOW IT WORKS

The skin tissue is composed of the outer layer called epidermis, and below that is the dermis and hypodermis that contain fat. The protective membrane in the epidermis layer can isolate skin from harmful environmental toxins and substances. At the same time, the protective membrane hinders skin from absorbing nutritious ingredients. To enhance our skin's absorption of nutrition, the principle of a high-tech, ion-guided technique is marvelous: a galvanic current connects the device and the human body to make a complete circuit loop, driving the ionized solution to penetrate through the skin's protective membrane, allowing it to directly reach the deep layers of the skin.

In this guiding process, the galvanic current stimulates the skin with its thorough massage, accelerating the development of skin tissues and promoting the generation of collagen and elastic fibers. In doing so, the skin becomes soft, energized, youthful, and radiant!

THE TECHNOLOGY BEHIND skinXpert

PROPERTY OF POLARITY IONS

The mildest impulse current anode (+) and cathode (-) can soften and clean dirt and oil sebum deposits that clog pores. This deep treatment acts as a natural cleanser that helps reduce pore size. Ion function helps to improve uneven skin pigmentation, and smooth out lines and wrinkles. Enriched charged oxygen ions activate nutrients to repair damaged skin structure and awaken tired cells.

PROPERTY OF MICRO-CURRENT

A gentle electrical stimulation used to support skin correction by encouraging the repair process for compromised skin. Micro-current gently encourages repair of every layer of the skin to foster a healthier state. It is beneficial for improvement in the appearance of the skin. The treatment plumps up the skin to restore a youthful appearance.

PROPERTY OF GALVANIC WAVES + EMS

Galvanic Waves stimulates metabolism and micro-circulation to make the skin more plump, elastic, firm, and younger-looking. Electro-Muscle Stimulation (EMS) causes collagen under the skin to contract, resulting in a skin-tightening effect. Using a high level of radio frequency energy to heat the skin to tighten and rejuvenate the skin's collagen structure, which weakens with age and exposure to sun. High frequency waves works in partnership with the magnetic field technology to build up cell energy. This internal energy helps the skin with its self-healing.

PROPERTY OF ULTRASOUND

Ultrasound uses acoustic waves at a precise frequency to deliver the ion-charged ingredients deep into the skin to the area where skin cells are formed. The sound waves help to build, tighten, lift and stimulate tissues under the skin to increase collagen production.

PRODUCT FEATURES

1- Ion and Micro-current Transmitter

2- Function Button

3- Power On/Off

4- Intensity Button

5- Intensity Level Indication Light:
Green-Low
Red-High

6- Device's 4 Functions:
Detoxify, Lifting, Firming, Smoothing

7- Touch Sensor Conductor

8- Battery Compartment

ION + MICRO-
CURRENT
TRANSMITTER
FUNCTION
POWER
INTENSITY:
Low / High
• Detoxify
• Lifting
• Firming
• Smoothing
DERMOVA

COMPARTMENT

PRODUCT SPECIFICATIONS

Please carefully read this entire manual before use.

Power Supply	2 PCS AAA Battery
Working Current	10 ~ 50 mA
Rated Voltage	3V
Measurement	135 x 38 x 23 mm
Weight	43 g

OPERATION AND SETTINGS

1. Press and HOLD the power button until the device switches on.
2. Press the intensity button to select the desired intensity level. Green LED indicates low. Red LED indicates high.
3. Select from the following treatment: detoxify, lifting, firming, and smoothing. Press ONCE for detoxify, TWICE for lifting, THREE times for firming or FOUR times for smoothing.
4. Press and HOLD the power button to switch device off.

KEEP IN MIND

To ensure the release of ions during treatment, always keep your finger on the metal plated touch sensor conductor on the back-side of the device. There is no vibration during the smoothing phase.

PREPARATION BEFORE TREATMENT

1. Remove makeup and thoroughly cleanse skin before using this device.
2. Always apply ACTIVATION SERUM. The water-based and ion charged skin care products will help increase the conductivity of current and maximize effectiveness and results.
3. Apply more ACTIVATION SERUM if the skin becomes dry during treatment.
   - Gently wipe the device down with a soft damp cloth when the device becomes contaminated by any dirt and oils.
   - Do not use too closely on the eyes and ears.

FUNCTION 1: DETOXIFY

Deeply cleans pores by removing excess oil sebum deposits, dirt, pollutants and impurities while clarifying skin tone.

1. Apply ACTIVATION SERUM to desired areas of the face and neck.
2. Power on device. Select intensity level and press DETOXIFY function button.
3. Gently glide the device over your face in small circular motions and neck in swiping motions, moving along from the center of the face and neck outwards.

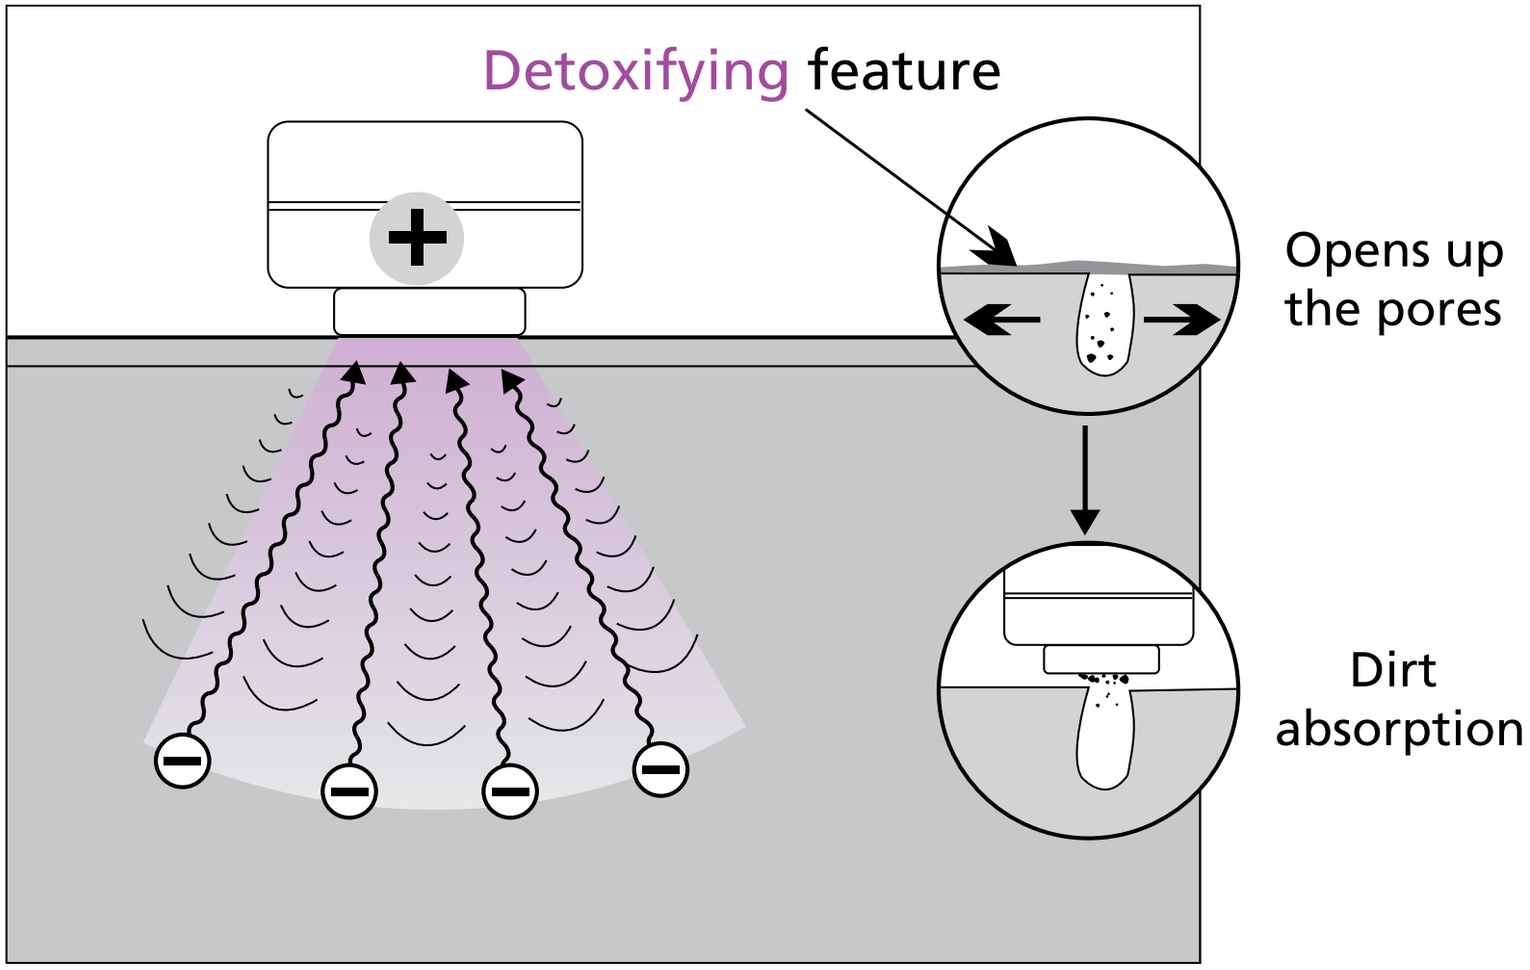
1 Detoxify

Targets:

Pimples
Acne

Clogged Pores

Rough Skin

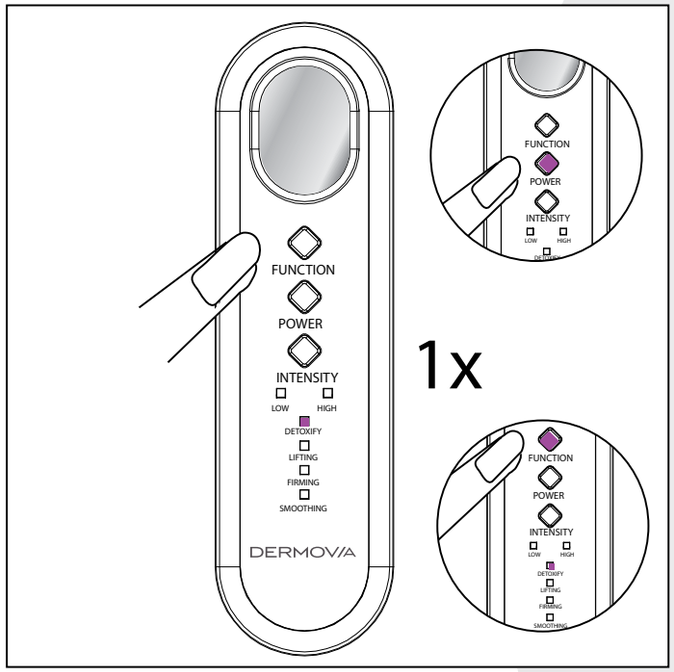


Polarity charged ions extract out oil sebum from pores and dissolve dirt for deep cleansing and purification.

FUNCTION 1: DETOXIFY

1. Wash face thoroughly and remove any traces of makeup.

2. Apply ACTIVATION SERUM to desired areas of the face and neck.



3. Power on device. Select intensity level and press function button once to set on DETOXIFY mode.

4. Glide the device over your face in small circular motions + neck in swiping motions, moving along from the center of the face and neck outwards.

FUNCTION 2: LIFTING

Tightens, lifts and tones aging skin, while exercising facial muscles and correcting undefined contours that can cause wrinkles and restores elasticity.

1. Press LIFTING function button.
2. Apply more ACTIVATION SERUM to the desired parts of the face and neck if needed following first phase.
3. Move the device slowly from side to side and in upward motion over desired areas of the face and neck. Focus on one area for 5-10 seconds at a time. Glide device slowly in two centimeter increments across the skin. Repeat as desired.

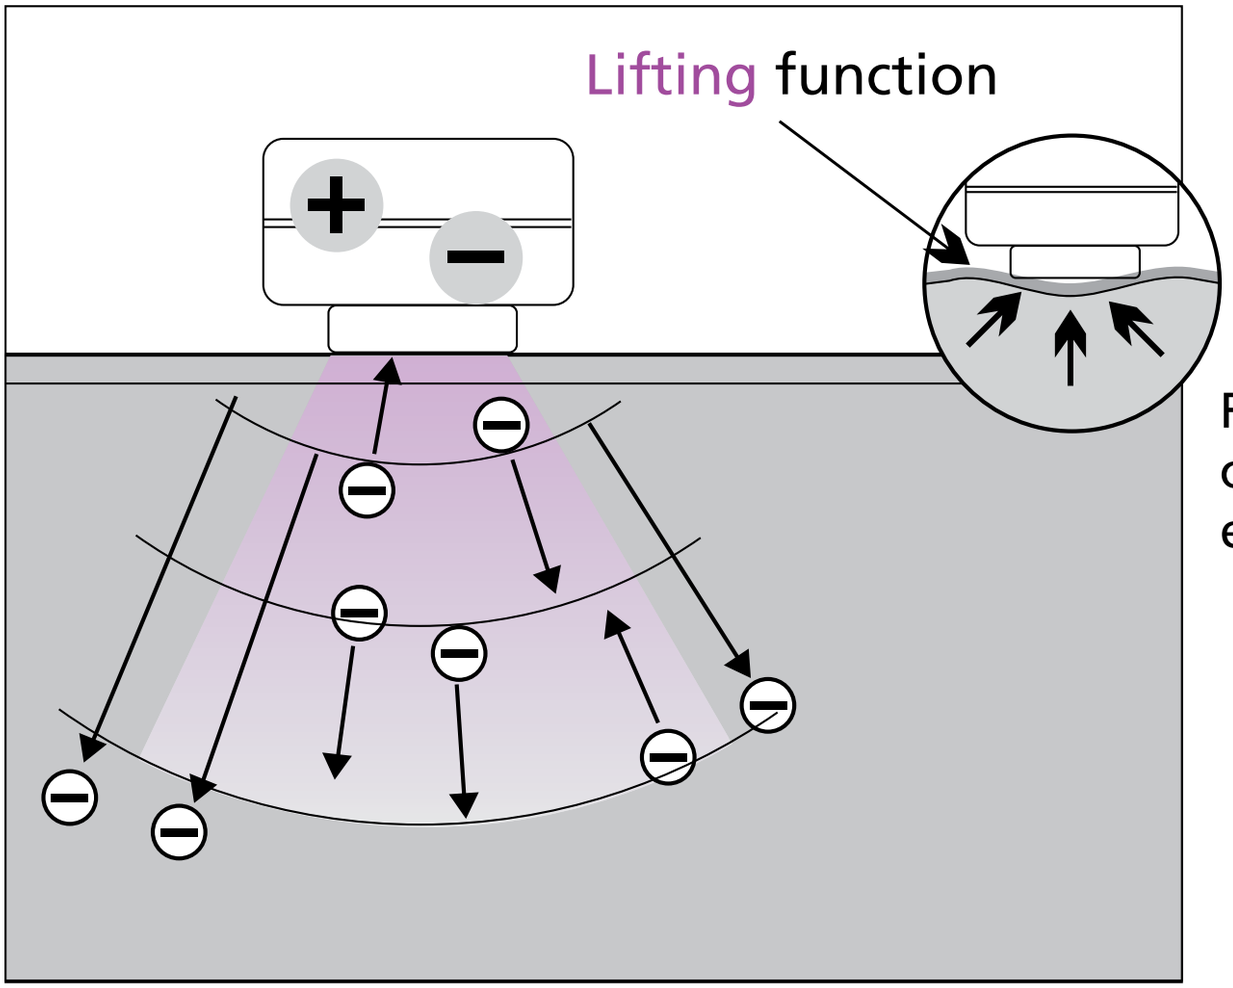
2 Lifting

Targets:

undefined contours

sagging skin

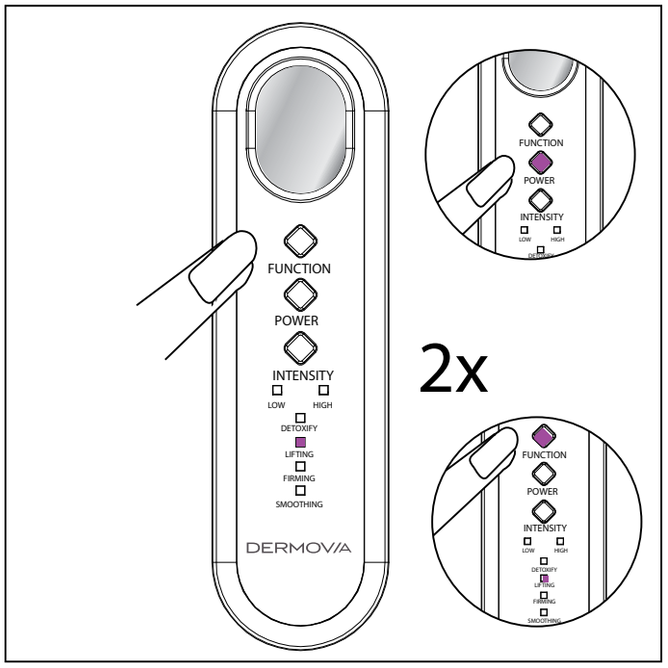
puffiness



Rejuvenates collagen and elastin fibers

Electro-currents and galvanic waves penetrate deep into skin’s tissue to restore hydration and tightness.

FUNCTION 2: LIFTING



1. Apply more ACTIVATION SERUM to the desired parts of the face and neck if needed following first phase.

2. Press function button twice to set on LIFTING mode.

3. Move the device slowly from side to side and in upward motion over desired areas of the face and neck. Focus on one area for 5-10 seconds at a time. Glide device slowly in two centimeter increments across the skin. Repeat as desired.

FUNCTION 3: FIRMING

Increases elasticity and replenishes skin with nutrients to promote youth and radiance. The micro-vibration massage feature helps stimulate blood circulation and improves skin metabolism.

1. Press FIRMING function button.
2. Apply more ACTIVATION SERUM to the desired parts of the face and neck if needed following second phase.
3. Slide the device from side to side slowly over desired areas of the face and neck. Focus on one target area and hold for 5 seconds. Glide device in upward motion in two centimeter increments across the skin.

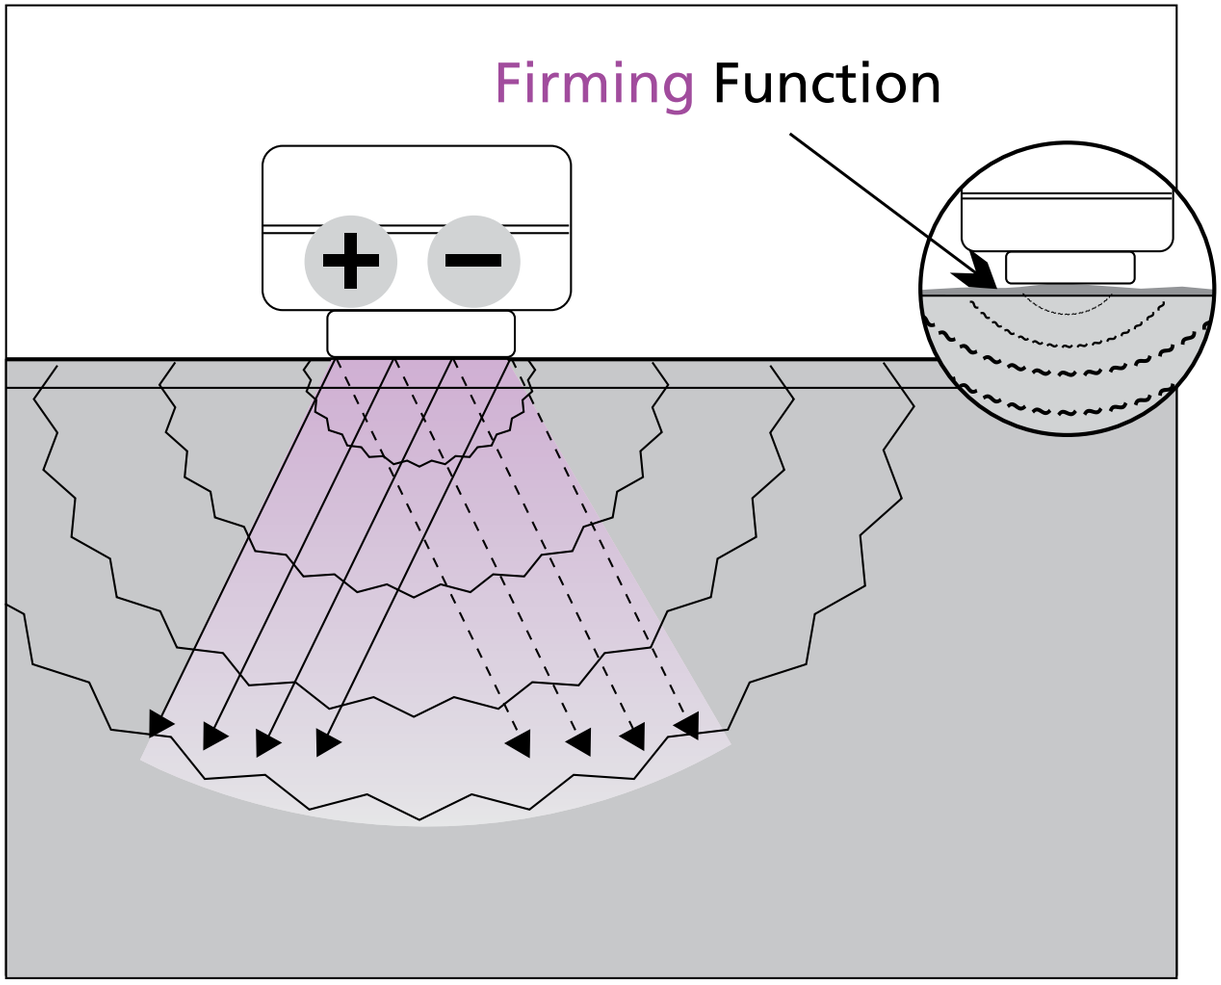
3 Firming

Targets:

dehydrated skin

broken capillaries

aging skin

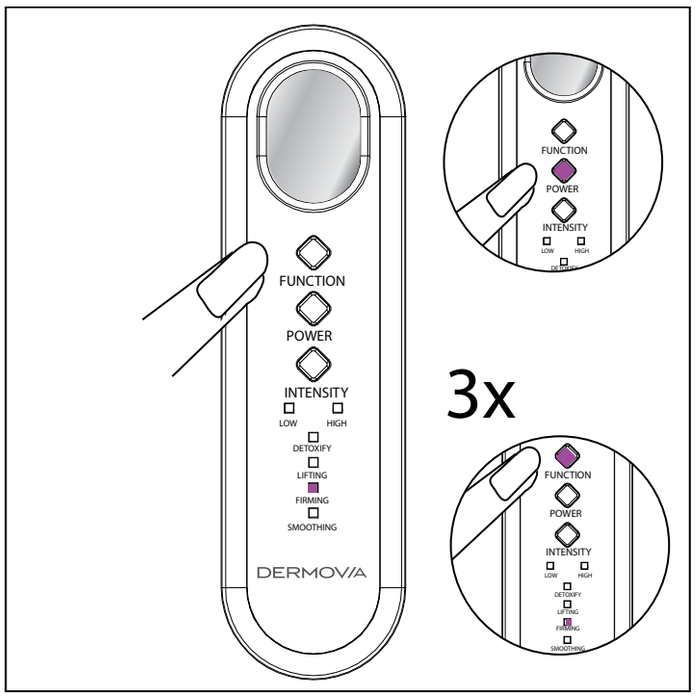


Restores pH balance

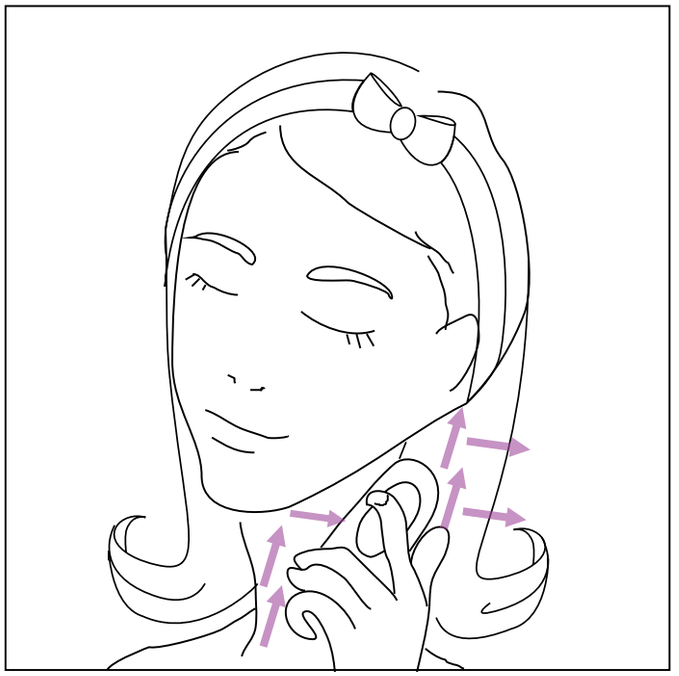
Delivers nutrients deep into basal layer of skin to repair elasticity and promote collagen production.

FUNCTION 3: FIRMING

1. Apply more ACTIVATION SERUM to the desired parts of the face and neck if needed following second phase.



2. Press function button three times to set on FIRMING mode.



3. Slide the device from side to side slowly over desired areas of the face and neck. Focus on one target area for 5-10 seconds. Glide device in upward motion in two centimeter increments across the skin.

FUNCTION 4: SMOOTHING

Replenishes lost moisture in the skin and increases elasticity. It improves the tone of your skin and reveals a clear and soft complexion.

1. Press SMOOTHING function button.
2. Apply more ACTIVATION SERUM to the desired parts of the face and neck if needed following second phase.
3. Move the device slowly over desired areas of the face and neck in large elongated circular motions. Focus on one target area for 5-10 seconds. Glide device in upward motion on the neck in two centimeter increments across the skin.
4. When treatment is completed, the device will automatically turn off after being idle for one minute.

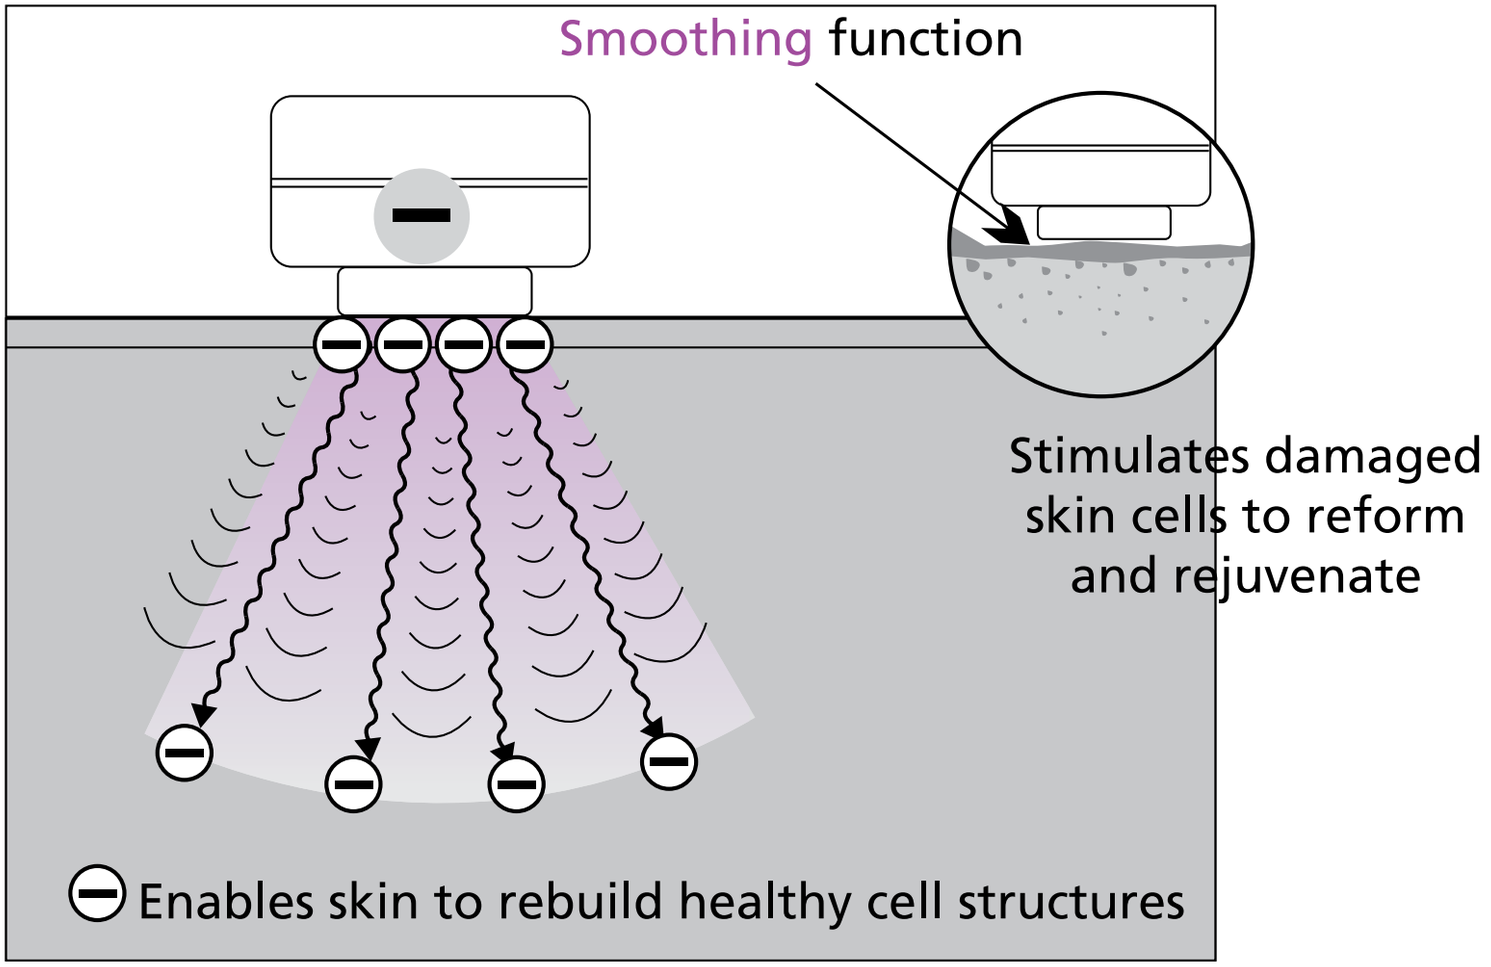
4 Smoothing

Targets:

fine lines + wrinkles

skin divets + acne scars

hyper-pigmentation

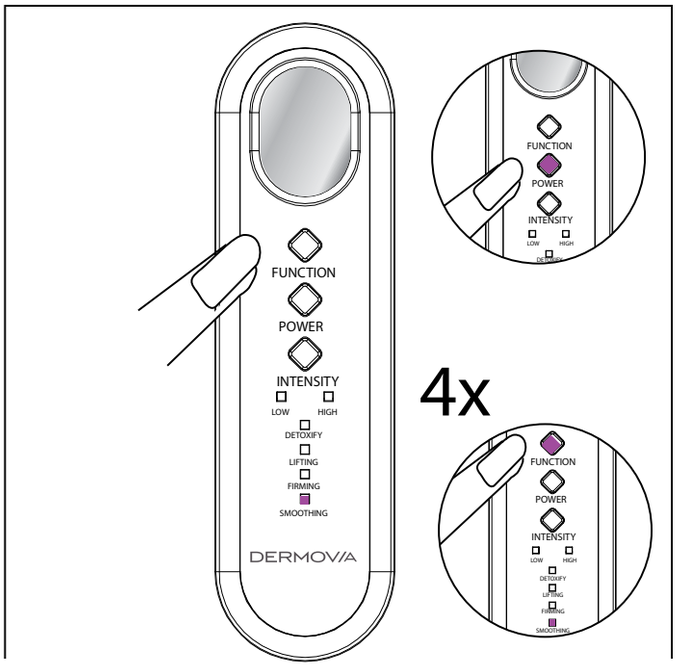


Smoothing function
Stimulates damaged skin cells to reform and rejuvenate
Enables skin to rebuild healthy cell structures

Reverses environmental damage and replenishes moisture reservoir of the skin. It increases production of elastin and collagen fibers and protects skin from early deterioration.

FUNCTION 4: SMOOTHING

1. Apply more ACTIVATION SERUM to the desired parts of the face and neck if needed following third phase.



2. Press function button four times to set on SMOOTHING mode.

Replenishes lost moisture deeply into the skin to increase skin elasticity. It improves the tone of your skin and reveals a clear and soft complexion.

3. Move the device slowly over desired areas of the face and neck in large elongated circular motions. Focus on one target area for 5-10 seconds. Glide device in upward motion on the neck in two centimeter increments across the skin.

4. When treatment is completed, the device will automatically turn off after being idle for one minute.

DIFFERENT SKIN TYPES

The SkinXpert is designed to solve problems of dry skin, oily skin, sensitive skin and aged skin.

Treatment Mode	Skin Type/Suggested Treatment Time				
	Normal	Dry	Oily	Sensitive	Aged
Phase 1: Detoxify	4 minutes	4 minutes	4 minutes	2 minutes	4 minutes
Phase 2: Lifting	4 minutes	4 minutes	2 minutes	2 minutes	4 minutes
Phase 3: Firming	4 minutes	4 minutes	2 minutes	2 minutes	4 minutes
Phase 4: Smoothing	4 minutes	4 minutes	4 minutes	2 minutes	4 minutes
Recommended Intensity	Low, High	Low, High	Low	Low	High

Note: Treatment time relects combined day + night usage. Each function turns off automatically after 4 minutes.

- Daily treatment is advised for normal, dry and aged skin. For sensitive and oily skin types, use the SkinXpert every 3-4 days. If your skin is very sensitive, use the SkinXpert only once a week.

- As improvements are achieved, you can reduce the amount of usage for continued maintenance.

- We recommend using the SkinXpert both in the morning and at night following the suggested treatment time chart.

- Do not leave the SkinXpert on sensitive areas such as the eye contour and mouth for a prolonged period of time.

- It is perfectly normal to feel a slight tingling sensation during treatments caused by galvanic & micro-currents. Adjust intensity level to a comfortable setting.

- To avoid skin irritation, we recommend NOT exposing treated skin to excessive heat (i.e. blow drying, hot showers, sauna, steam, tanning) shortly after treatment.

DETOXIFY

PREFERRED TREATMENT MOTION FOR SPECIFIC AREAS

Lower and Middle Neck

- Position the Transmitter on one side of the lower neck by collar bone. Slowly glide the SkinXpert from center towards the back. Repeat on other side.

Upper Neck

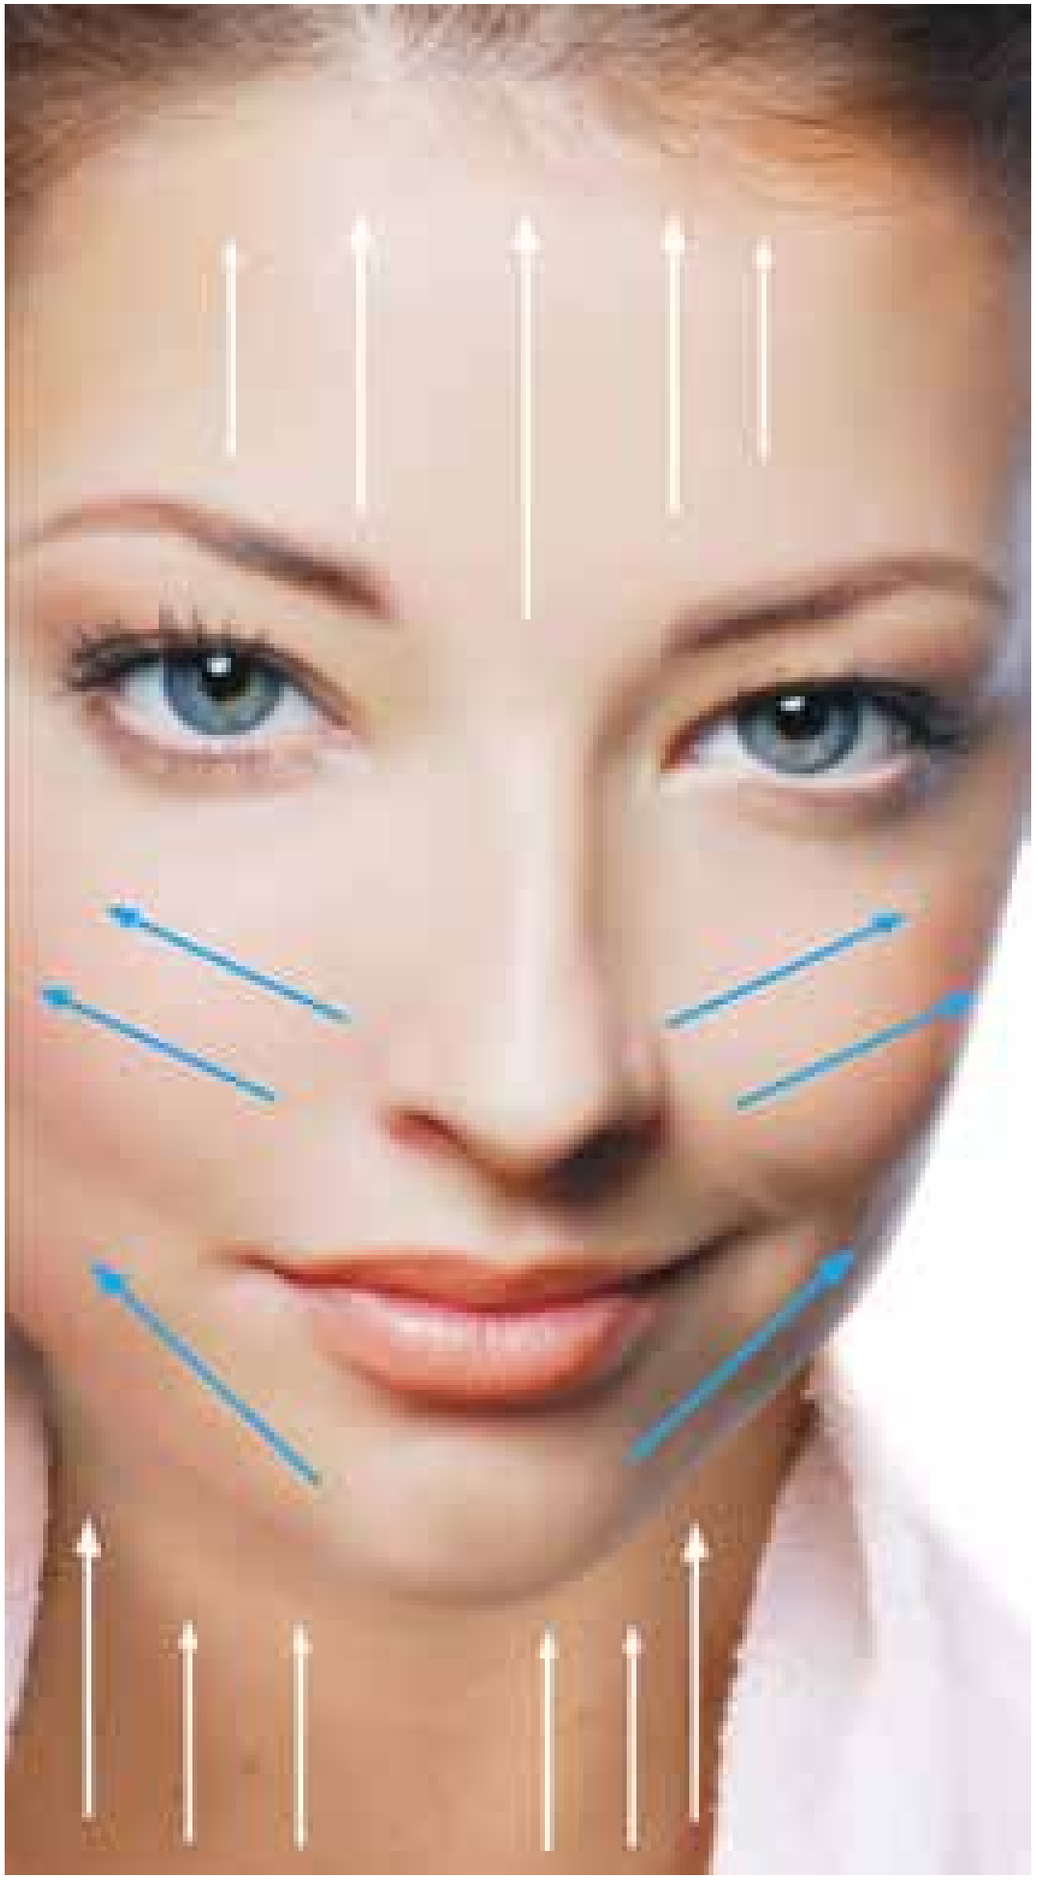
- Position the Transmitter on upper neck area (on one side) and right under the jaw line.
- Slowly glide the device from center of neck towards ears.
- Repeat these steps for each area three (3) times.

  Glide in slow upward motion.

Jaw Line

- Position the Transmitter on the chin.
- Slowly glide the device from the chin area and follow along the jaw line up to the ears. Repeat on other side.

LIFTING



Lower Cheeks

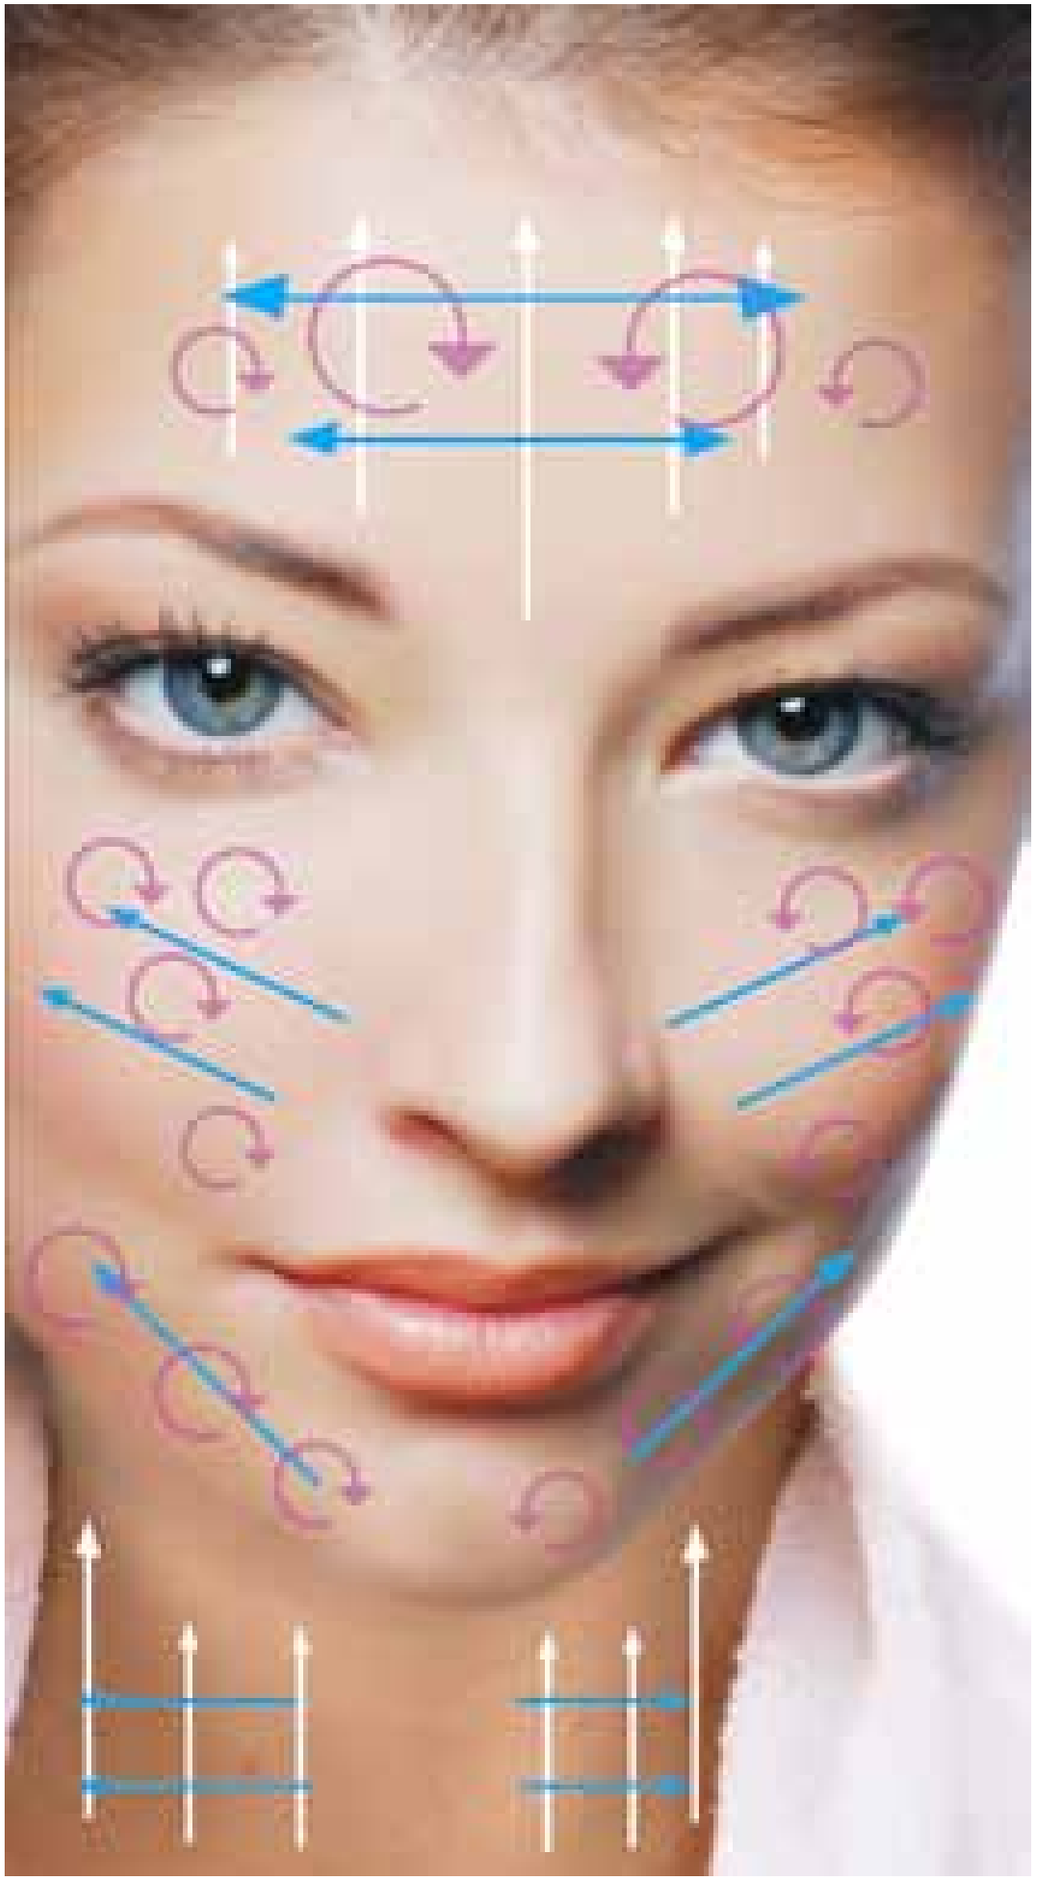
(Depressor Anguli Oris Muscle)

- Position the Transmitter slightly under your cheek bone, starting from the corner of the mouth.
- Slowly glide the device from center of cheeks and follow along cheek bone towards the ears.

Upper Cheeks and Temples

- Position the Transmitter under your cheek bone, by your nose, and stay away from inner eye sockets.
- Slowly glide the device from the nose upward and around the eyes towards the temple.
- Repeat these steps for each area three (3) times on each side of the face.
- Glide the device slowly for maximum results.

FIRMING + SMOOTHING



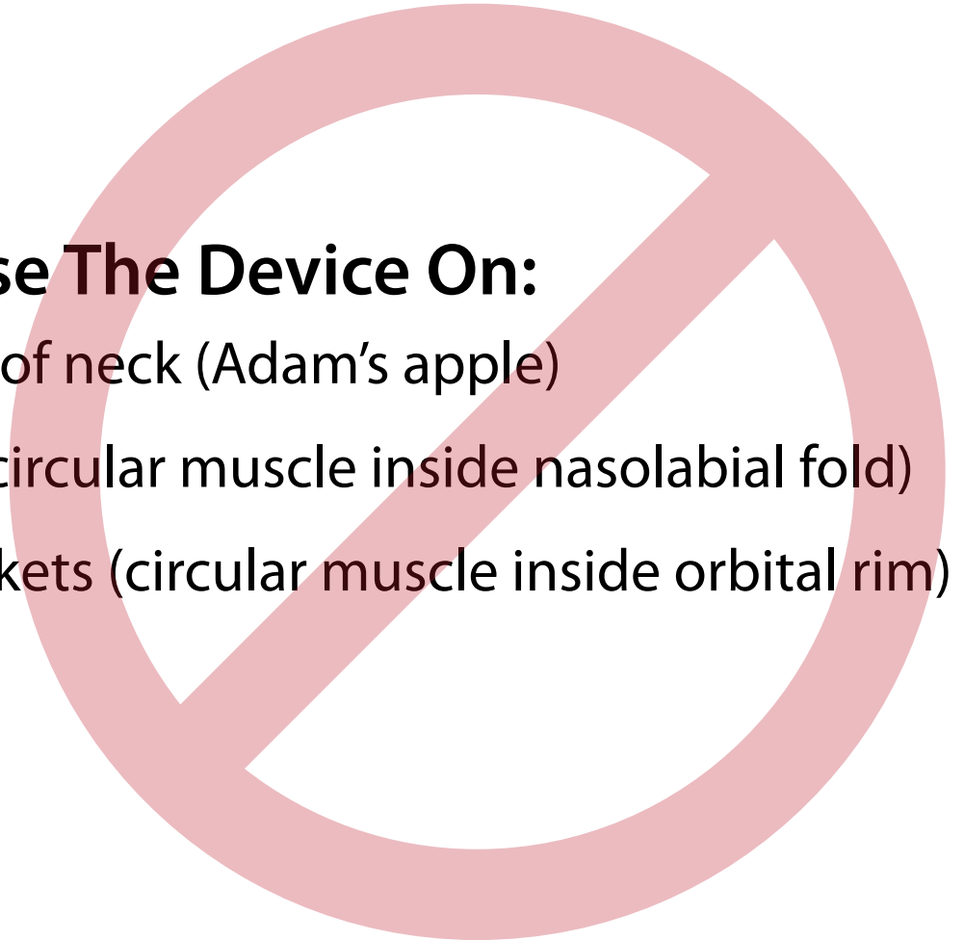
Forehead

(Corrugator and Orbicularis Oculi Muscles)

- Position the transmitter slightly above your brow.
- Slowly glide the device upward towards the hairline, across entire forehead, and along the sides.
- Repeat three (3) times over each area.
- Repeat steps on both sides of face.

Do Not Use The Device On:

- Mid line of neck (Adam's apple)
- Mouth (circular muscle inside nasolabial fold)
- Eyes sockets (circular muscle inside orbital rim)



FAQS

1. What type of results will I see?

Based on both micro current and galvanic technology, SkinXpert allows you to achieve professional home spa results in 16 minutes. Its specially designed four-step-beauty system helps to draw out the impurities and deliver beneficial ingredients into deep for skin rejuvenating, wrinkle removal, skin toning and lifting, more defined jaw line and cheekbone. With prolonged use, the results are cumulative and enhance and last longer.

2. How long can I see the results?

Usually it takes at least 2 weeks to see noticeable results. The results are accumulated; each treatment builds upon the last. For enhanced results, please use proper Dermovia skin care products for each step.

3. Do I have to use the four steps for 16 minutes every time?

You can choose certain treatment step according to your skin type. To maximize results, it is suggested to do different treatment times based on the different skin type you have. You can find the time that correlates to your skin type in the section “Different Skin Types”.

4. When should I do the treatment, in the morning or night?

You may do the treatment at anytime that fits your schedule. SkinXpert acts as an extension of your daily skincare regimen.

5. Can I do the treatment more than once a day at home?

Any more often than once in a 24 hour period is not recommended as the muscles need some rest time between treatments.

6. What kind of products do I need in order to maximize the effect of SkinXpert?

SkinXpert emits different ions with different polarities for different treatment step. The main theory is “Like charges repel each other while the unlike charges attract each other”. In this case, to maximize the effects, please use negative charged skin care products. The skin care products used for the device are suggested to be water-based, because oil might compromise the conductivity of the current as a whole.

7. What do I feel during treatment?

During the treatment, a slight tingling may be felt in certain areas. Facial sensitivity varies from individual to individual. Please choose proper intensity to your comfortable level. Then, you can feel the micro-vibration massage.

8. The device vibrates at a certain frequency level during treatments. Does the device still work during the vibration intervals?

We designed the vibration at intervals to save battery energy. The ions resulted from the gentle current is continuously working as long as a circuit is formed between body and the device. A finger has to be placed on the touch sensor conductor on the back of the device while the Transmitter is touching the skin.

9. Will the device hurt?

The current used for SkinXpert is at a gentle frequency level that has a low output and is safe for use.

10. Can I use SkinXpert if I have rosacea, acne, broken capillaries or skin cancer?

SkinXpert can be used be on rosacea, acne and broken capillaries. We recommend lowering the intensity of the device to avoid sensitivity. The device should not be used if you have skin cancer or other severe skin disorders. Consult your physician before use.

11. How long will the batteries last?

This depends on your amount of usage and brand of battery. Only use AAA batteries.

12. Can we use it with other beauty devices?

Do not use other electrical beauty devices simultaneously (at the same time) when using SkinXpert.

CARE AND MAINTENANCE

- Over time, some spots may appear on the ion function sensors, but they do not compromise the function or quality of the SkinXpert.
- The device is not waterproof. Do not place near liquids or submerge into water. Do not use in the shower.
- After every treatment, wipe the device with a clean and slightly damp cloth. Do not rinse off under running water.
- Do not clean the device with corrosive chemicals.
- Store the device in a cool, dry place and away from steam or high-moisture areas.
- Device will malfunction if dropped or damaged by force.
- Replace batteries when device is not performing at an optimal power level.
- Do not disassemble or reassemble the device.

SAFETY INFORMATION

Please read this manual carefully before using SkinXpert.

- Before using this device, take off any metal objects such as earrings, necklaces, bracelets or any other piercings you may have.
- Do not use the device if you have skin inflammations, infections, or have undergone recent cosmetic procedure.
- Do not use the device if you have skin allergies to metals.
- Consult your doctor if you experience any skin irritations.
- Check with your physician before using this device if you are pregnant, have a pacemaker, are epileptic or have a metal implant.
- Keep the device out of the reach of children.
- Don’t use device near flammable substances.
- Don’t use device in the eye socket and mucous membrane.

WARNINGS + CAUTIONS

Read user manual thoroughly and follow instructions. Use this device only for its intended purpose. Although our device is safe to use, incorrect usage can limit its effectiveness and lead to skin damage.

- Stainless steel sensitive people must use a gauze mask to add a layer of protection.
- Do not use if diagnosed with deep tissue wound, eczema, and tumors.
- Only use device with suitable products for your skin. Dermovia products are recommended.
- Don’t place device where children can easily access.
- Pregnant woman must consult your doctor before use.
- Don’t use if product appears broken. Please contact the manufacturer or distributor. Email support@dermovia.com
